Using Dreamweaver Extension manager
Dreamweaver Sprys and Widgets
Creating Functional Tableless Forms
Working with Customer data
Investigating the Adobe Labs

Description

This course is the next natural step in your website creation career. Learn to build amazing web interfaces with little knowledge of code. Achieving that powerful web 2.0 look easily with Dreamweaver's useful advanced tools will be a 'snip' once you can learn to master the Spry suite of tools Dreamweaver offers

Who is this course for?

This course is for any serious web designers/developer who are looking to move the next stage in web design and to build powerful Web 2.0 style websites.

Assumed Knowledge

You will need to be comfortable with what is required to develop a web site and have completed the Dreamweaver 101 Rookie course.

What you will learn

By the time students are finished with this course they will have comfortable knowledge of building table less web sites with CSS. Students will also have a much better understanding of building effective, functional forms with clever validation techniques. Web 2.0 will no longer be a 'term' but a reality as you will be able to work with Dreamweaver's Spry tools; building Accordions, Tabbed Panels, Data sets and much more...
